about us

25+ year rich legacy of delivering optimum quality

Architectural hardware is a matter where art and science merge seamlessly. On one hand, it is all about creating a distinct aesthetical appeal with the finest material, design and finishes. On the other, it requires perfect skiles to provide flawless performance.

At Perfect Marketing, we know this profoundly.

After all, in our journey of more than 25 years of designing, crafting and delivering top-notch architectural hardware, we have always strived to strike a delicate balance between heart-touching creativity and mind-pleasing engineering prowess.

And we have added the third angle to the story too! Apart from maintaining the unmatched quality of our products, we have excelled in elevating standards of services. We have established a nationwide strong network of distributors and dealers and in some of the areas, we offer same-day delivery too.

So, be it a decore for a classy apartment, swanky bungalow, upbeat retail space or ultra-modern office complex, we have ample solutions to make your decor stand out, that too, with reliable functionality. Have a look at our offerings on the following pages. We are sure that just a glance will prompt you to initiate a long-term, cordial relationship!

Quality

We believe in establishing and running a striving business on the sound basis of transparent dealing and flawless quality. For us, quality is the fundamental tenet of business. Quality implies offering all consumers cutting-edge goods and services that completely meet their needs.

With all in-house designing and production facilities, you get assurance of the finest quality with **Pisa**.

Our goal of quality control is to ensure that production proceeds efficiently, predictably, and inexpensively. It can sometimes be used to improve the control and predictability of already in place production processes. A combination of statistical methods, engineering expertise, and organizational skills is established for the same at **Perfect Marketing**.
